

4 BASIC QUESTIONS, 1 IMPORTANT MISSION:

- 1) With over 18,000 species of animal and plant possible in Rhode Island, which are really here?
- 2) A lot of people know something about Rhode Island's animals and plants.
How can we add these facts up to get a usable knowledge of our environment?
- 3) How can we encourage young people to develop interests in wild animals and plants?
- 4) How can we conserve our natural resources if we don't know what or where they are?

Yes! I Want to Join the Rhode Island Natural History Survey

My Membership Contribution:

- Provides science and information to conservation organizations that preserve Rhode Island's natural heritage.
- Supports Rhode Island naturalists, helping them develop their skills and contribute to environmental conservation.
- Sponsors lectures, conferences, and other educational events.
- Promotes natural history values for the next generation.
- Brings me discounts, news, and recognition.
